GAME ON

On June 29, it was an outdoor day to get to know the city and its legends more broadly, introducing us to many of the city's secrets by visiting the archaeological scene, which was interesting to its ancient historical mosaic figures.

are you ready!

Presentations by participants from the three countries

An illustration of three stylized human figures in a meeting. The figure on the left is wearing a blue shirt and dark pants, gesturing with their right hand. The middle figure is wearing a black shirt and blue pants, holding a tablet. The figure on the right is wearing a blue shirt and white pants, also holding a tablet. Above them are three blue gears and three white speech bubbles with blue dots. The figures are standing on a blue base with two white pots containing green plants on either side.

CCIF Cyprus

We take social cohesion seriously! This week of activities, workshops and fun perfectly fits into our mission of bringing closer different cultures in a welcoming and non-formal way, while keeping our goal for better education in different aspects, such as the environment, the entrepreneurship, the digitalisation and the sustainability. Our work spans also in many European projects which youth can use in their growth, such as the European Solidarity Corps

Cyprus environmental challenges

Our island is subject to the challenges of climate change as much as many other places: desertification and the protection of the marine environment -with the notable example of turtles- and a better waste recycling system are among the main aspects

Through a small storytelling experience, we explored how we're living in our countries and which challenges and problems we face in our routines, finding that many of them are environment-related

CAMPING C

Don't

Digital Public Services

Our group presented how digitalization is analyzed in the EU in the public assistance sector, divided into many sections which ensure residents have the best, quickest and most effective experience with their administrations.

**you can now help the
environment, adopt 3
solutions**

- Wind energy
- composters
- electric transport
- public transport
- solar energy panels
- deforestation
- reduce carbon
- tree planting
- no testing on animals
- fines for non cleaners
- shelters
- take a bag to the store
- no plastic bottles
- choosable boxes

**DONT FORGET
PLANET STARTS
WITH YOU**

Lithuania

ARTIFICIAL INTELLIGENCE
GET READY 4 THE FUTURE

- The uptake of AI technologies in the European Union, enterprises can be grouped in three groups: the ‘adopters’ (42%) who are currently using at least one AI technology, the ‘non-adopters’ (40%) who do not currently use AI nor intend to use any of the AI technologies (at least in the following two years) and those enterprises, who have plans to adopt AI in the next two years, however they are currently not using AI solutions (18%).
- The Digital Compass target⁷ requires that more than 75% of EU companies adopt AI technology by 2030.

presentations on
problem solving
ways;**

happy hour

Intercultural Happy Hour

Enough talking about us! The groups from Georgia and Lithuania brought many exquisite products from home, as well as insights, trivia and history of their traditions. We even danced and played a quiz game on what we've learned from them. A perfect ending of the day!

LETS DANCE

The Program of the Campaign

Why are we here? Youth is passionate about understanding and making the world in which we live a better place compared to how we received it from the past generation. In this exchange, the groups are going to design a social media campaign which will be the tool to bring home the knowledge learned and spread awareness to their peers. Many different types of media have been used and then published on the Instagram page @planetyouth2022.

The Logo

A creative competition has been made to decide the logo of our Instagram page, and of the campaign. After the different groups have submitted their works, either in pen and paper or on the phone, the same youngsters voted their favourite. This is the most !voted, and the official logo of the campaign

1. Protect
2. Warning
3. Respect
4. Development
5. Beautification
6. Refinement
7. Attention
8. Clean
9. Care
10. Learn
11. Assimilation
12. Use

**VOTE
RIGHT**

The Parts of the Campaign

After the logo competition, it's time to create the actual !campaign

First of all, Lilas explained the important phases of a successful campaign, helping the people to decide their target group, the subjects of the campaign and the messages to convey

Then, the groups decided their favourite medium to use in their campaign

and the winning
logo is.....

1. Protect
2. Warning
3. Respect
4. Development
5. Beautification
6. Refinement
7. Attention
8. Clean
9. Care
10. Learn
11. Assimilation
12. Use

THIS !!

Digital and Green Tech by Dr Ieva

To design an efficient campaign and be able to spread awareness to our peers, it's necessary to have at least some theoretical knowledge of what we want to change in the world. That's why during this day Dr Ieva enlightened us on the challenges and opportunities of using the digital transition as a powerful tool to reduce our environmental footprint and optimize our waste and efforts. The groups also managed to look first-hand some of the aspects of the digital services given and analyzed by the EU in Member Countries and make small presentations about them

Georgia

The Youthpass Workshop

This youth exchange is not only a fun way to visit a new country, meet new people and learn and share views on the environment, but also an important piece to build young people's careers and CVs with new skills! The Georgian group's leader, Tamta Jinjolava, explained to us what is youthpass, which are its aims and how will this week help them building it

Haiku

Environmental School Activity and the Haiku Method
After so intense work on theory, the afternoon has been spent relaxing and reflecting in a more creative and poetic way on the environment. The Lithuanian girls and boys gave us an important introduction to Haiku poetry and their strong connection with nature, then it's been our turn! Everybody wrote haikus in our language or English and then shared them with their peers, exchanging also more sweet and gentle insights and in takes on nature and its importance

The flower of time
That I took care all my life
Falls your last petal

Laikščijs gards,
Jis pagavo varlytę.
Ji jam žlando

Im like a lonely flower petal,
lost in the mind by Evita

Participants were invited
to create their own haiku
and make a little
illustration for it
3lines
~17 word syllables

AT THE pool

After this hard work, the girls and boys have well deserved their rest and fun by the pool...but sticking to the theme of the week: sustainability

Mauro hosted a very peculiar quiz game with questions and bonuses which spanned all the aspects of the environment's protection, pollution and recycling. Glory and prizes for the winners, but those who lost...got themselves refreshed into the pool

Sculpted the
connection between
nature and human with
our own hands.

Testimonials

- In the project “Protecting planet starts with you” we did a lot of amazing activities: we made digital logos, we discussed the environmental issues and a lot more stuff.
- For the project we traveled to an amazing city called Paphos, Cyprus. We meet a lot of new amazing people, made a lot of friendships and learned about environmental issues, that we didn’t know before.
- Today I am in the amazing city Paphos, we have many activities with great volunteers Mauro, Marco and Lilas, that are teaching us new things about environment.
- “Protecting the planet starts with you” is a project in which we learn about environmental issues, we are generating ideas and the solutions, we are making new friends and last, but not least we are exploring the beautiful city Paphos.
- For the project “Protecting planet starts with you” we learned that there is even more environmental problems in the whole world than we all thought, so many of all the participants are really happy to be in Paphos with all the amazing people.

Testimonials

- Having the opportunity to express yourself is one of the best feelings in the world, and the project “Protecting planet starts with you” is a really great experience for me and all my classmates, because here we can speak, discuss, brainstorm, and learn new things.
- In the project “Protecting the planet starts with you” we learned about environmental problems, getting to know new cultures, meeting amazing people, and also learning about all of the opportunities for volunteering that EU can suggest.
- For a whole week I and my classmates are spending our summer vacation in the beautiful city of Paphos. Here we are learning new things about environmental problems, learning how to digitalize our ideas, create logos, and make new friendships.
- A few days before me and my classmates had a long journey from Lithuania from Paphos, but it was a worth it, because now we are having fun, learning new things and also expressing ourselves in every possible way. Love this new experience.
